# Rome Tours Safety & Support

Our traveler's safety is our number one priority. We would never send a traveler to a location we believe to be unsafe.

Whether it's a worldwide pandemic or a sprained ankle, a missed flight or confusing medical paperwork, we've seen it all and we have the experience to handle it.

## **Guided the whole way:**

Perhaps the best thing we do differently than our competitors is that we are with our traveler's from the beginning of the trip. We meet our travelers at their local airport and our company representatives handle the check in process. We will be together until we make it back to the home airport.

## **Safety First Designed Itinerary:**

Extensive research is conducted to ensure the accommodations, transportation, walking routes, tour operators, food services, and all other activities are safe and reputable. For our international tours we only go places and take part in activities that are proven, not only by our company but also by leading international tour operators across Italy.

## **Medical Services:**

We identify English speaking health professionals that will accept our travel insurance convenient to the areas of Rome we will be each day.

## **Pharmacy Services:**

To buy many medicines in Rome you will need a prescription. A prescription can be obtained from any of the medical services listed above.

However many individual pharmacists are able to be a little more flexible than their counterparts in other European countries, and if you can produce a prescription from your home country, or sometimes even the box that the drugs came in to prove you were issued them before, sometimes they are able to issue the medicine anyway.

## **Travel Insurance:**

**All international travelers are offered international insurance that covers medical needs that may arise.**
